

The electronic water softener **DeCal** that eliminates limestone and prevents its formation thus prolonging the life of the appliances, can be easily installed by anyone with basic D.I.Y. skills.

Thanks to specific electronic impulses transmitted to the water from the control unit through a spiral wound, the crystalline structure of the calcium and magnesium salts is modified. These unite and form bars and in this way can no longer join together to form limestone deposits. The harmless bars of limestone, in the form of a fine powder, remaining suspended in the water, are removed from the water flow. The residual particles can be easily removed without the use of aggressive detergents. The limestone and rust deposits from the pipes will be slowly removed.

Due to the fact that **DeCal** is applied externally to the pipework, the original chemical composition of the water does not undergo any modifications. The minerals and micro elements that are important for the human body remain intact as no chemical additives are used. Food and drinks keep their natural taste as the water is not treated with invasive resins. The only improvement that could be made would be by using a simple micro filtration to eliminate chlorine, odours and flavours.

Code	Description	Pcs. Per package	Pcs. Per Carton / Pallet
DCL01012	STANDARD ELECTRONIC DECALCIFER KIT ½". 230V – 3,5W. Installation for non predisposed systems with a ½" coil to wrap around the tubing e da ½", 4 aerators	1	/ 315
DCL02012	ELECTRONIC DECALCIFER ASSEMBLY KIT ½". 230V – 3,5W. Control unit + coil wrapped around tubing ½" L.250mm, 4 aerators	1	/ 315
DCL01034	STANDARD ELECTRONIC DECALCIFER KIT ¾". 230V – 4,5W. Installation for non predisposed systems with ¾" coil for tubing, 4 aerators	1	/ 315
DCL02034	ELECTRONIC DECALCIFER ASSEMBLY KIT ¾". 230V – 4,5W. Control unit + coil wrapped around tubing ¾" L.250mm, 4 aerators	1	/ 315
DCL010100	STANDARD ELECTRONIC DECALCIFER KIT 1". 230V – 5,5W. Installation for non predisposed system with coil for tubing 1", 4 aerators	1	/ 315
DCL020100	ELECTRONIC DECALCIFER ASSEMBLY KIT 1". 230V – 5,5W. Control unit + coil wrapped around tubing 1" L.250mm, 4 aerators	1	/ 135
